Sleepover Party:

Brief:
You have invited friends to your house for dinner and a sleepover. You have a budget of $80 to buy food for 8 people. Your job is to plan a meal, make a shopping list and work out if you have any money left for movie snacks.

Key questions to think about:
1. What do you plan to provide for the main meal and dessert?
2. Where will you get the information you need to help you make the shopping list and work out how much it will cost?
3. What ingredients will be needed for your meal? Do you need to adjust your recipe so that it will feed 8 people?
4. How much of each ingredient will you need to buy? How much will this cost?
5. Will you have enough money to buy all of the items on your shopping list? If not, how will you adjust your plan so that you have enough money?
6. Will you have any money left for snacks? If so, what can you buy with the money that is left?

What you need to hand in:
1. A menu showing the food and drinks you plan to offer
2. Any recipes you will use showing how you adjusted them to suit 8 people
3. A shopping list including:
   o A list of all ingredients
   o The best way to buy each of the ingredients
   o The cost of each ingredient
4. The total cost of the meal and how much change you will have left. Include a list of snacks you will buy with the change.
